Time to play with Brushes!

Go to this website: **DeviantArt.com**

Search for 'brushes'. Be careful - some of these are just jpegs. You need an actual set.

Explore and download any you would like to play with. Once you download them, they should appear in your brushes.

1) Find at least five new brushes.
2) Create one brush (edit>Define Brush Preset)
3) Create Five new works of art using photos of your choice.

You can create cool grunge looks, or wild wackadoodle pics. Please try to emulate the ESPN gradient examples shown in class using a brush to help finish it off. Brushes can add depth and texture to your photos.

Put your five works of art in a folder titled:
'Brushes_StudentName'
