

## Something Doesn't Belong...

For this project, you need to create *three* different pictures. In each picture, you need to have something that shouldn't be there: like a *penguin* in the *desert*. Be creative!

- 1) Come up with idea.
- 2) Search the internet for images, or use your own
- 3) NO mug pictures from your mac - bad resolution!
- 4) Find your background picture, and open it in photoshop
- 5) Find the picture you want to select something from
- 6) Select your item using your variety of selection tools
- 7) Select it precisely & Place it very carefully
- 8) Save ALL three documents in a folder and put it in the share as "something doesn't belong\_student name. Remember, you want it to look REAL, not fake!

<b>A</b>	<b>A-</b>	<b>B+</b>
Excellent Selection	Great Selection	Pretty Good Selection
Can't see any mismatched colors/white backgrounds, noise, or any jagged edges	Only a few hints of edges around the selection, only a hint of background noise	Can see some jagged edges on selection with some background noise
Excellent Placement	Great Placement	Pretty Good Placement
Selection looks like it was taken in the original photo	Selection could have been in original photo, but looks a little off	Selection looks off balance with original photo
Realistic & Credible	Almost Realistic	Not So Much

Each piece is worth 25 points

TOTAL = 75 points
