

Warp Using Free Transform

Please use this in the Symmetry and Flamenco pictures

To adjust or warp a selection:

- 1) first click on rectangular selection tool
- 2) put feathering - a box near the top left - at 2.5 to soften selection
- 3) select what you will warp
- 4) hit cmd J - your selection should appear in a new layer
- 5) Go to Edit and select Free Transform>Warp
